## **FOR YOUR SAFETY**

If you smell gas:

1. Open windows.
2. Don't touch electrical switches.
3. Extinguish any open flame.
4. Immediately call your gas supplier.

## **FOR YOUR SAFETY**

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

### ***Important***

**TO THE INSTALLER** — Please leave this instruction booklet with the unit.

**TO THE OWNER** — Please take a few minutes to read this booklet and keep it for future reference.

# **IMPORTANT SAFETY INSTRUCTIONS**

1. Never use your appliance for warming or heating the room.
2. Children should not be left alone or unattended in area where surface unit is in use. They should never be allowed to sit or stand on any part of the surface unit. This applies to adults also.
3. Wear proper apparel. Loose-fitting or hanging garments should never be worn while using the surface unit.
4. User servicing - Do not repair or replace any part of the surface unit unless specifically recommended in this manual. All other servicing should be referred to a qualified technician.
5. Flammable materials should not be stored in, on, below or near surface units.
6. Do not use water on grease fires. Smother fire or flame or use dry chemical or foam-type extinguisher.
7. Use only dry potholders. Moist or damp potholders on hot surfaces may result in burns from steam. Do not let potholders touch open flame. Do not use a towel or bulky cloth.
8. Use proper pan size. Select utensils having flat bottoms large enough to cover the top burner. The use of undersized utensils will expose a portion of the flame to direct contact and may result in ignition of clothing. Proper relationship of utensil to burner will also improve efficiency.
9. Utensil handles should be turned inward. To minimize burns, ignition of flammable materials, and spillage due to unintentional contact with the utensil, the handle of the utensil should be positioned so that it is turned inward and does not extend over adjacent burners.
10. **CAUTION:** Do not store items attractive to children in cabinets above the surface unit. Children climbing on the surface unit to reach items could be seriously injured.
11. Never leave surface unit unattended at high heat settings. Boil overs cause smoking and greasy spillovers that may ignite.
12. The top burner flame should be adjusted so that it does not extend beyond the edge of the cooking utensil.

## **SAVE THESE INSTRUCTIONS**

# **OWNERSHIP**

## ***Registration Card***

Take a minute...

Before you use your cooktop, please fill out and mail your ownership registration card. This card will enable us to contact you in the unlikely event of a product safety notification and assist us in complying with the provisions of the Consumer Product Safety Act. **THIS CARD DOES NOT VERIFY YOUR WARRANTY.**

Keep a copy of the bill of sale showing the date of purchase and/or date of installation of your cooktop. **PROOF OF PURCHASE WILL INSURE YOU OF IN-WARRANTY SERVICE.**

Write down the following information. You will need it if your cooktop ever requires service.

Model Number\* \_\_\_\_\_

Serial Number\* \_\_\_\_\_

Date Purchased \_\_\_\_\_

Date Installed \_\_\_\_\_

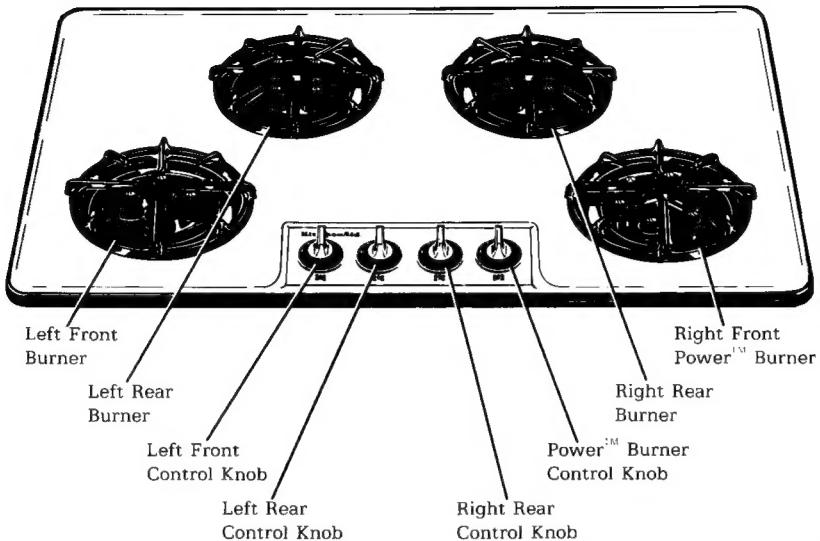

Dealer's Name \_\_\_\_\_

Address \_\_\_\_\_

Phone Number \_\_\_\_\_

\*Model and Serial Numbers are located on a nameplate on the rear corner of the burner box bottom.

# FEATURES

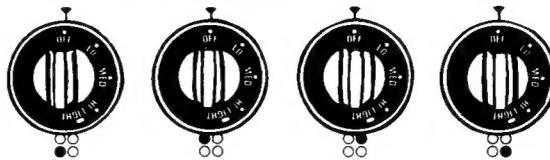

Your new KitchenAid gas cooktop is equipped with four exclusive DAISY® BURNERS made of rugged cast iron and porcelain. They provide even heat distribution across the bottom of the pan, and infinite temperature control, from a "bead" of flame to a high volume blue flame.

- Right Front Burner - Daisy® Power™ Burner
  - 12,000 BTU's natural gas; 11,000 BTU's LP gas
  - Six flame areas
  - Use for cooking large quantities of food, deep-fat frying or your everyday cooking needs.
- Other Three Burners - Daisy® Burners
  - 8,000 BTU's natural gas; 7,000 BTU's LP gas
  - Four flame areas
  - Use for everyday cooking.

# HOW TO USE

The diagram below each knob indicates which burner that particular knob controls.

## To Operate:

Grasp the control knob, push down and turn to the left to "LIGHT". Gas flowing into the burner will be ignited by the electric spark ignitor and you will hear a clicking sound, indicating that the ignitor is functioning.

When the burner is lit, turn the control knob to the right to the desired flame setting, see guide below. The control knobs do not have fixed positions between "HI" and "LO". They can be turned to any of the settings indicated, or to any position in between. The ignitor will turn off and the clicking will stop when the control knob is turned from the "LIGHT" position to another setting.

## Control Setting Guide

- HI** To start foods cooking, to bring foods to boiling, for fast frying.
- MED** To continue frying after starting on "HI". For foods cooked in a double boiler.
- LO** To keep smaller amounts of food at the boiling point and for gently simmering foods, melting butter, chocolate, etc.

**Important -** The slots along the front and sides of the cooktop provide the necessary air supply for proper operation of the burners and should not be blocked.

**NOTE:** If the burner does not ignite, check the ignitor by listening for the clicking sound. If you do not hear the ignitor click, TURN THE BURNER OFF. Check to make sure the service cord is firmly in place in the wall receptacle. Check for a tripped circuit breaker or blown fuse.

IF THE SPARK IGNITOR STILL FAILS TO OPERATE,  
CALL YOUR NEAREST AUTHORIZED SERVICE OUTLET.

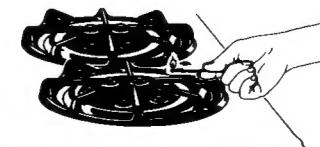

### ***Cooking Tips and Facts***

- For best cooking results, always use cooking utensils with flat bottoms, straight sides and tight fitting covers.
- Adjust flame size so that it heats just the bottom of the pan and does not extend over the sides of the pan.
- Use only the correct size cooking utensils. Heat reflected from pans much larger than the outside edge of the burner flame may result in damage and/or discoloration of the cooktop or drip pans.
- When using LP (propane gas), a slight pop or flash may occur at the burner ports a few seconds after the burner has been turned off. This may be due to the variations in the composition of LP gas and usually occurs after the burner has been on a long time and has become hot. This is normal operation for your cooktop.

**NOTE:** In wiring old homes, polarity was not always observed. Although polarized receptacles (3 prong) may have been installed, if wired incorrectly, the ignitor will find a grounded condition and will click intermittently even with all the controls turned off.

### ***How to light your cooktop during a power failure***

You may safely use your cooktop during an electrical power failure by turning the control knob to "HI" while carefully holding a match to the burner.

# CARE AND CLEANING

## *General Cleaning Precautions*

1. Always clean cooktop with CAUTION. Never use a wet sponge or cloth to wipe spills from hot cooking area as this can result in steam burns. Allowing excess moisture to collect in control area can result in the failure of the ignitor switches. Some cleaners can produce noxious fumes if applied to a hot surface. Read label before using.
2. Wipe up any spills as soon as possible to prevent them from baking onto the cooktop.
3. Keep the appliance area clear of combustible material, gasoline and other flammable vapors and liquids.

**Several finishes have been used on this cooktop and some require special attention to the cleaning agents used to keep it looking new. To extend the life of your cooktop, follow the cleaning instructions below.**

**CONTROL KNOBS** - The control knobs can be removed by pulling them off the switch stem. Wash in warm, soapy water. Dry and return knobs, matching the flat side of the knob with the shaft.

When cleaning control panel with control knobs removed, DO NOT allow water to run down inside unit.

**BURNER GRATES** - Grates may be removed and washed in warm, soapy water. Dry thoroughly.

**DRIP RINGS** - Wipe any spills as soon as possible to prevent "baked-on" spatters. Clean in dishwasher; or in warm, soapy water, then rinse and wipe dry.

"Baked-on" soil may be removed by rubbing lightly with a soap-filled scouring pad.

**NOTE:** Discoloration of Drip Rings may occur from heat reflected from pans too large for the burner. This discoloration is permanent and cannot be removed. Be sure pans used do not extend more than one inch over the edge of the burner.

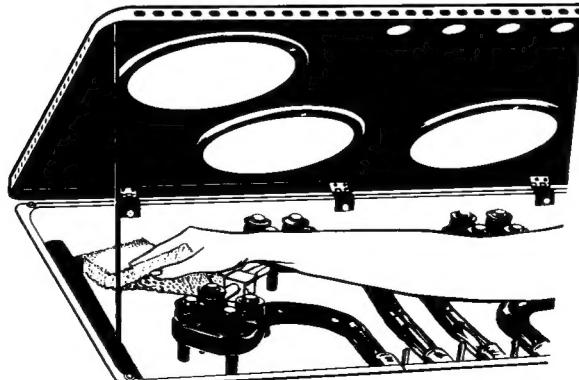

**BURNERS** - Remove knobs and raise cooktop and place the support rod in position to hold cooktop up.

Wipe the tops of the burners with a warm, soapy cloth, rinse and dry thoroughly.

**NOTE:** Make certain all the ports (holes) are open after cleaning.

Due to the rapid temperature changes, the porcelain may pop off the edges of the burner rings and ends of the grates. Do not be concerned as this does not change the heating or cooking quality of the cooktop. The base metal cast-iron burners soon darken to blend with the black porcelain.

**BURNER BOX** - Remove control knobs. Raise cooktop and place support rod in position. Wipe with a warm, soapy cloth, rinse and dry thoroughly.

**PORCELAIN ENAMEL OUTSIDE FINISH**

The porcelain enamel used on your cooktop is acid resistant, but not acid proof. Therefore, if acid foods such as citrus juices, tomatoes, rhubarb or vinegar, as well as alcohol or milk, are spilled on the porcelain enamel, they should be wiped up immediately and not permitted to remain on the surface as they may affect the finish. Use a paper towel or dry cloth on warm surfaces. After the porcelain enamel has cooled, you may wipe it with warm, soapy cloth, rinse and dry thoroughly.

**BRUSHED CHROME OUTSIDE FINISH**

- Wipe with warm, soapy cloth, rinse and dry thoroughly. Never use steel wool, abrasives, ammonia, acids or commercial oven cleaners which may damage finish.

Any mild glass cleaner will remove fingermarks or smears from the top. Remember to clean with the grain to avoid possible scratches.

**NOTE:** Discoloration of the porcelain enamel or brushed chrome finish may occur from heat reflected from pans too large for the burner. This discoloration is permanent and cannot be removed. Be sure pans used do not extend more than one inch over the edge of the burner.

# **WHEN YOU NEED SERVICE**

## ***Follow these steps***

1. If your cooktop should fail to operate, review the following list before calling your dealer. You could save the cost of a service call.
  - Has a fuse blown, or is the circuit breaker open?
  - Is electric cord plugged into receptacle?
  - Is manual gas shut-off valve open?
  - Are pilot flash tubes properly aligned?
  - Are burner ports plugged?
  - Are grates positioned so that locating pin is in hole in cooktop?
2. If the problem is not due to one of the above items, see "How to Arrange for Service" listed in the Warranty Statement.
3. If you are not satisfied with the action taken, contact the Major Appliance Consumer Action Panel (MACAP). MACAP is a group of independent consumer experts that voices consumer views at the highest levels of the major appliance industry. Contact them only when the dealer, authorized servicing outlet, wholesale distributor, and KitchenAid have failed to resolve your problem.

Major Appliance Consumer Action Panel  
20 North Wacker Drive  
Chicago, IL 60606

MACAP will in turn inform us of your action.

### ***In all correspondence about your cooktop, please include:***

- Date
- Your Name, Address, and Telephone Number
- Type of Appliance
- Brand
- Model Number
- Serial Number
- Date Purchased
- Dealer from Which Purchased (include address)
- Servicing Agent (include name and address if different from dealer's)
- Location of Appliance
- A Clear Description of the Problem and the Service Required.

# **KitchenAid Cooking Equipment**

## **WARRANTY**

LENGTH OF WARRANTY:	KITCHENAID WILL PAY FOR:	KITCHENAID WILL NOT PAY FOR:
ONE YEAR FULL WARRANTY FROM DATE OF INSTALLATION	Replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by a KitchenAid wholesale distributor or by one of their authorized KitchenAid servicing outlets.	A. Service calls to: 1. Correct the installation of the cooking equipment. 2. Instruct you how to use the cooking equipment. 3. Replace house fuses or correct house wiring.
FIVE YEAR LIMITED WARRANTY ONE YEAR FULL PLUS SECOND THROUGH FIFTH YEAR LIMITED FROM DATE OF INSTALLATION	Replacement parts (labor costs not included) for any burner if defective in materials or workmanship.	B. Repairs when cooking equipment is used in other than normal home use. C. Damage resulting from accident, alteration, misuse, abuse, improper installation or installation not in accordance with local electrical codes. D. Any labor costs during limited warranty. E. Replacement parts or repair labor costs for units operated outside the United States.

**KITCHENAID, INC. DOES NOT ASSUME ANY RESPONSIBILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion or limitation may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

### **HOW TO ARRANGE FOR SERVICE**

- First call your dealer or repair service he recommends.
- If you are unable to obtain satisfactory service, contact the KitchenAid wholesale distributor in your area. A complete distributor listing is printed in the Use and Care Guide furnished with the product.
- All service should be handled locally by the dealer from whom you purchased the unit or an authorized KitchenAid servicing outlet or wholesale distributor. If your local service is not satisfactory, contact Consumer Affairs, KitchenAid, Inc., 3800 Space Dr., Dayton, Ohio 45414, (513) 454-6800.
